

Application: SOURCE for Rural Farms

Site Name: The Farm in Byron Bay

Location: Byron Bay, NSW, Australia

Installation Method: Rooftop

Array Size: 10 Hydropanels

Project Overview

The Farm is a collection of micro-businesses whose mission is to inspire the community to lead healthy, sustainable lifestyles. Businesses on The Farm include a restaurant, bakery, event venue, garden, and education center. The Farm partnered with Zero Mass Water to install 10 SOURCE Hydropanels on their restaurant, Three Blue Ducks. Mounted on the roof, visitors of The Farm can now enjoy a glass of delicious and renewable SOURCE water made from the sunlight and air all around them. SOURCE perfectly complements The Farm's mission by showing the possibilities of technology working in harmony with nature to provide locally produced, high-quality drinking water.

This project received funding as part of ARENA's Advancing Renewables Program.
