

**Site Name:** Berkeley Home

**Location:** Berkeley, California, USA

## Project Overview

An avid biker and outdoorsman, the owner of this beautiful Berkeley home was tired of drinking low-quality, unhealthy water. Looking to upgrade his water quality, he found SOURCE as a sustainable, healthy drinking water option that supports his active lifestyle. Before his bike rides, he now hydrates with water that is good for him and the environment—creating up to 300 liters of perfected water each month.

## SOURCE Usage and Satisfaction

“I love the idea of being able to capture clean, healthy, drinkable water right at my house. When I’m off on a ride, I fill my bottle with water that I know is clean.”

- Skip B., Homeowner
