Customer Story

**SITE NAME** | Crest Watersports Centre

**LOCATION** | Pyrgos, Cyprus

## GOAL

---

Crest Watersports Centre is a waterfront business located on the island of Cyprus. The ocean is their livelihood, so the owners were extremely interested in finding ways to help protect the delicate ecosystem that surrounds them.

## CHALLENGE

---

In order to access drinking water, Crest depended primarily on single-use plastic bottles which are indicated as an extremely harmful waste product that pollutes the ocean and kills marine species.

## SOURCE PROJECT

---

Crest partnered with HydroScot Energies to use their facility as a demo site, installing two Hydropanels with a water line dug underground to a chilled dispenser. Today, the staff enjoys clean, great-tasting water that doesn't require them to compromise sustainability.
