

Application: SOURCE for Rural Homes

Location: Crookwell, New South Wales

Installation Method: Ground Mounted

Array Size: 5 Hydropanels

Project Overview

At this rural property in Crookwell, New South Wales, the homeowner was seeking an additional drinking water solution to supplement their existing supply from a rainwater tank. Since installing SOURCE Hydropanels at the property, the owners now enjoy high-quality, delicious and renewable drinking water, while continuing their use of rainwater for showers, toilets and other domestic uses.

This project received funding as part of ARENA's Advancing Renewables Program.
